

Lehr Brigade 900 (motorized)

September 22, 1941

Formed in June of 1941, participated in the Russian Campaign until disbanded in April of 1942

Notes: Infantry Battalion I has the later war infantry platoons with the 3 I 6 attack. This is not a typo, these platoons were organized in the late war fashion with extra light and heavy machine guns mixed into the rifle platoons. The Panzer Lehr units were demonstration units and were sometimes used for experimental formations such as this. Consider this a peek into the future 1943 reorganization.
